

réseau inDREAM network

international network for the Diffusion of Recorded Electronic & Acousmatic Multichannel music

The members of the inDREAM *network* are both individuals and independent venues or structures.

Each member remains in charge of its own programme, planning, schedule and mode of operation.

inDREAM is not a business network : no membership fees, no paid staff, everything is done on a voluntary basis.

It is about coordinating information of its members to :

- create, maintain and share a repertoire of multi-channel works (and their technical information : configuration, etc.)
- propose federative events
- organise partnerships or the occasional provision of broadcasting equipment
- carry out joint communication on inDREAM activities via the main social networks and the Fediverse (management by the administrators of groups, pages, events ...)
- publish a common quarterly newsletter for the subscribers of each member

Required conditions :

- To have an equipped space or a mobile device for multi-channel diffusion (minimum configuration : 8 channels).
- To establish an annual programme of diffusion sessions (if possible, at least quarterly) of multichannel works whose space is written/fixed beforehand so that the broadcast can take place autonomously. ¹
- The programme of each diffusion session includes works by male and female composers in equal measure from all over the world (physically present if possible).

¹ The author or a third person can nevertheless influence the distribution (e.g. adjusting the levels) if the need arises.
